The increased flexibility will also lend itself to discovery of true value of Company’s shares. Management also explained that in today’s globalised economic environment, the distinction between local and foreign is blurring since people are moving around and Thai people living and having business ventures abroad also want to participate into the developmental activity of Thailand and this will enable them to participate, so this is very important to relax the shareholding limit.

Question : Shareholders asked to clarify about the current situation and future of the company

Answer :
The President explained as follows:-
With the acquisition of Columbian chemical, Birla Carbon as a whole has become the largest Carbon Black producer entity. He further explained that the Birla Carbon Management is looking at it to be the largest in respect of being Green, Global, meeting all environment norms, and delighting all its stakeholders like customers, Business partners, Government and community at large. He also explained it is the vision of
Birla Carbon to extend best value to our customers who buys our products and also giving best value to the shareholders who holds shares in our companies. The management team of Thai Carbon Black under the direction of Board is committed to achieve vision of the Group.

He further explained that we are aware that complete Euro zone is suffering from economic crisis and all the tire companies using the product of your company exports around 50% to 60% of their product to Europe and North America. This type of demand reduction has led the tire companies to reduce their production to the level of 70-75% of total production capacity. The business of your company is also being impacted from the imports of cheaper Carbon Black from China and it is important to know that in china the raw material is available at cheaper price and therefore the carbon black. This is putting lot of pressure on volumes and margins in markets like Indonesia, Malaysia, Japan and other south East Asia. Government is also continuously tightening environmental norms. We have to make the capital expenditure to meet these norms. In this scenario two things needs to be taken care of. To conserve the cash and improve the working capital and this is the strategy the company is working on under the guidance of Board. Almost 8 months now the plant is running at lower production capacity due to the reduction in demand and imports from china but the management is trying all its efforts to take strategic measures like improving the Quality and yield, diversification of feedstock etc. to continue to remain competitive into the market and protect margins.

The meeting concluded at 18:00 hrs.
