12 images have been found and 12 images can be optimized

12 images represent

**Before  
optimization**

**After  
optimization**

## Fast loading is good for users and business

People are impatient in front a slow loading website, that's the result of a recent study. Amazon's calculated that a page load slowdown of just one second could cost 1% in sales each year (1.6 billion). Source statistica.com.

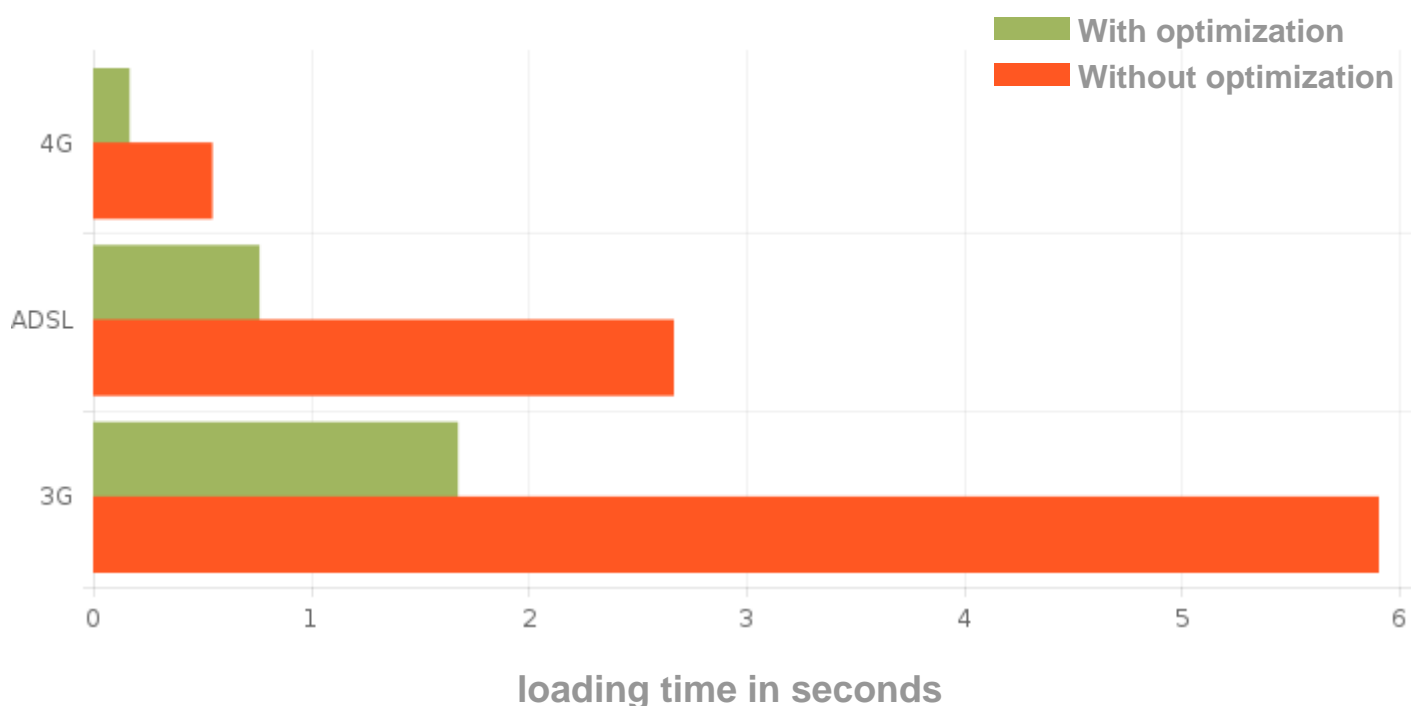

Use image and PDF optimization for a short loading time and keep the visitors on your website.

## Even better on mobile devices

Latest global statistics said that mobile traffic now reached around 25% of the whole website visitors. As a consequence, mobile users are consuming more and more data. (Source Wearesocial)

You can have the fastest server on earth, mobile user will need to download your website content. That's why it's even more important to compress images and PDF, so mobile visitors will have less content to download to have the first element displayed.

## This is how much time you'll save with optimization:

## 12 images could be optimized

Image optimized	Size before	Size after	Gain
<a href="http://fanda.uga.edu/sites/all/themes/corolla/css/images/button.png">http://fanda.uga.edu/sites/all/themes/corolla/css/images/button.png</a>	211.00B	135.00B	36.02%
