

## Heavy Metals

Birla Carbon's carbon black products include all ASTM, BC, CD, Conductex®, Copeblack®, PM, Raven®, and Ultra® grades.

Heavy metals, such as lead, mercury, cadmium, and hexavalent chromium are not intentionally added to Birla Carbon's carbon black products during the manufacturing or handling processes. As a result, Birla Carbon does not routinely analyze for these heavy metals; however, based on process knowledge and analytical data of several carbon black products, Birla Carbon can confirm that the four heavy metals are present in our carbon black products at concentrations less than the threshold levels listed below:

- 0.1% by weight – lead, mercury, and hexavalent chromium
- 0.01% by weight - cadmium

The information presented within this publication is based on Birla Carbon's analysis and the analysis of others. Birla Carbon disclaims all representations and warranties regarding performance or use, express or implied, including implied warranties of merchantability and fitness for a particular purpose. The user is responsible for determining the suitability of any product for a specific purpose and the manner in which the product is used. Before handling, using, or processing any material, always read its Safety Data Sheet.
